

Professional Photographers Guild of Houston Imaging Competition 2021

GENERAL INFORMATION

This document is to serve as a guideline for the acceptance of entries, the judging of entries, and the selection of the ribbon winners at the regular PPGH monthly image competition & annual awards. The Image Competition Policy and Procedures document shall be applied to all qualified members' entries submitted for competition at each regularly scheduled image competition. This does not include entries shown or displayed at a Guild meeting or at a Guild function not directly related to the competition.

PPGH strives to use the same rules that PPA uses for the IPC (International Photographic Competition) and the District Competitions. This gives you the opportunity to test your images at a local level before entering these larger competitions. These rules pertain to images entered as digital files created by traditional photographic processes as well as those captured electronically with a digital camera or scanner.

Image competition will be held monthly during general meetings or at the decision of the PPGH Board of Directors.

 - Members must sign in for in-person image competitions by the conclusion of the image competition in order to qualify for awards/ribbons.
 - Members must join the online image competition prior to the conclusion of the judging in order to qualify for ribbons/awards.
- All qualifying entries shall be judged by a panel of 4 judges (three primary judges and one alternate).
- Judges will be briefed before the judging and be given a copy of the 12 elements and the scoring ranking.

JUDGING CRITERIA:

Each print will be judged using **The Twelve Elements of a Merit Image.**

The Twelve Elements listed below are in accordance to their importance.

1. **Impact** is the sense one gets upon viewing an image for the first time. Compelling images evoke laughter, sadness, anger, pride, wonder or another intense emotion. There can be impact in any of these twelve elements.
2. **Technical excellence** is the print quality of the image itself as it is presented for viewing. Retouching, manipulation, sharpness, exposure, printing, mounting, and correct color are some items that speak to the qualities of the physical print.
3. **Creativity** is the original, fresh, and external expression of the imagination of the maker by using the medium to convey an idea, message or thought.
4. **Style** is defined in a number of ways as it applies to a creative image. It might be defined by a specific genre or simply be recognizable as the characteristics of how a specific artist applies light to a subject. It can impact an image in a positive manner when the subject matter and the style are appropriate for each other, or it can have a negative effect when they are at odds.
5. **Composition** is important to the design of an image, bringing all of the visual elements together in concert to express the purpose of the image. Proper composition holds the viewer in the image and prompts the viewer to look where the creator intends. Effective composition can be pleasing or disturbing, depending on the intent of the image-maker.
6. **Presentation** affects an image by giving it a finished look. The mats and borders used, either physical or digital, should support and enhance the image, not distract from it.
7. **Color Balance** supplies harmony to an image. An image, in which the tones work together, effectively supporting the image, can enhance its emotional appeal. Color balance is not always harmonious and can be used to evoke diverse feelings for effect.
8. **Center of Interest** is the point or points on the image where the maker wants the viewer to stop as they view the image. There can be primary and secondary centers of interest. Occasionally there will be no specific center of interest, when the entire scene collectively serves as the center of interest.
9. **Lighting**—the use and control of light—refers to how dimension, shape and roundness are defined in an image. Whether the light applied to an image is manmade or natural, proper use of it should enhance an image.
10. **Subject Matter** should always be appropriate to the story being told in an image.
11. **Technique** is the approach used to create the image. Printing, lighting, posing, captures, presentation media, and more are part of the technique applied to an image.

12. **Story Telling** refers to the image's ability to evoke imagination. One beautiful thing about art is that each viewer might collect his own message or read her own story in an image.
